Safety Data Sheet

SALICYLIC ACID USP Section 6 - ACCIDENTAL RELEASE MEASURES

6.1. Personal precautions, protective equipment and emergency procedures:

Σ	Personal Protective Equipment :	Avoid contact with the skin and the eyes. Do not breathe dust. For further information refer to section "Exposure controls / personal protection". Wear proof-boots. Mark the contaminated with signs and prevent access to
		unauthorized personnel. Signal word. Stop leaking if safe to do so.
Σ	Skin Protection :	Use personal protective equipment
Σ	Respiratory Protection :	No personal respiratory protective equipment normally required
Σ	Work Practices:	Avoid contact with skin. When using, do not eat, drink or smoke.

6.2. Environmental precautions:

Do not allow uncontrolled discharge of product into the environment.

6.3. Methods and material for containment and cleaning:

- Recovery: Keep in suitable, closed containers for disposal.
- Decontamination/Cleaning: Decontaminate and wash the floor with: Sodium hydroxide (2 to 5%). Wash off with plenty of water.
- Disposal: Treat recovered material as described in the section "Disposal considerations".

Section 7 - HANDLING AND STORAGE

7.1 Precautions for safe handling

Technical measures:

Electrical bonding of pneumatic conveyor.

Earth the equipment.

Blanket with inert gas.

Advice on safe handling and usage:

Protect from moisture.

Avoid dust formation.

Avoid contact with water.

Provide adequate ventilation.

7.2 Conditions for safe storage:

- Protect against light.
- Keep away from open flames, hot surfaces and sources of ignition.
- Keep container tightly closed and dry.
- Packaging: Store in original container. Flexible container lined with a plastic film. Paper bag lined with a plastic film.

Packaging materials:

	rel. Plastic materials (polyethylene, polypropylene). naterials. Steel.
7.3 Specific end use(s): As mention in section 1.2.	
Section 8 – EXPOSURE CONTRO	LS/PERSONAL PROTECTION
8.1 Control parameters:	
∑ Contains no substances with	occupational exposure limit values.
8.2 Exposure Control:	
∑ Engineering measures:	Avoid splashes. Maintain air concentrations below occupational exposure standards. Extract at emission point.
∑ Respiratory Protection:	In case of dust or aerosol formation use respirator with an approved filter.
∑ Hand Protection:	The selected protective gloves have to satisfy the specifications of EU Directive 89/686/EEC and the standard EN 374 derived from it. Please observe the instructions regarding permeability and breakthrough time which are provided by the supplier of the gloves. Also, takes into consideration the specific local conditions under which the product is used, such as the danger of cuts, abrasion, and the contact time. Gloves must be inspected prior to use.
∑ Eye protection:	Safety glasses. In case of contact through splashing: wear face-shield and protective suit.
∑ Skin protection:	Protective equipment must be chosen according to the amount and concentration of the dangerous substance at the workplace. Remove and wash contaminated clothing.
∑ Hygiene measures :	Emergency equipment immediately accessible, with instructions for use. Ensure that eyewash stations and safety showers are close to the workstation location. Use clean, well-maintained personal protective equipment. Store personal protective equipment in a clean location away from the work area. Shower or bathe at the end of working. Regular cleaning of equipment, work area and clothing. When using do not eat, drink or smoke. Contaminated work clothing should not be allowed out of the workplace. Wash hands before breaks, immediately after handling the product and at the end of the day.
∑ Protective measures:	Protective equipment must be chosen according to current CEN standards and in cooperation with the supplier of protective equipment. Selection of personal protective equipment should be based on an evaluation of the performance characteristics of the protective equipment relative to the

Safety Data Sheet SALICYLIC ACID USP

- ∑ Involve workers in safety organizations, such as the system of Safety Representatives and Committees.
 - Do regular inspection using checklists made for the particular chemicals and chemical processes in use;
- Mark and label all chemicals;
- Example 2 Keep at hand an inventory list of all chemicals handled in the place of work together with a collection of Chemical Safety Data Sheets for these chemicals;
- Train workers to read and understand the Chemical Safety Information, including the health hazards and routes of exposure; train them to handle dangerous chemicals and processes with respect;
- Plan, develop and choose the safe working procedures;
- > Reduce the number of people coming into contact with dangerous chemicals;
- \(\) Reduce the length of time and/or frequency of exposure of workers to dangerous chemicals;
 - Train workers to know and understand the emergency procedures;
 - Equip and train workers to use personal protective equipment properly after everything possible has been done to eliminate hazards by means of other methods;

16.2 List of relevant R phrases:

R22 - Harmful if swallowed

R41 - Risk of serious damage to eyes

DISCLAIMER

Soapmakers Store shall not be held liable for any damage resulting from handling, application or processing of our ingredients, since the conditions of use are out of our control. Information provided by Soapmakers Store, including the composition or use of our ingredients, are provided in good faith, based on current technical and scientific knowledge, but without any warranty as to their accuracy or completeness.

Soapmakers Store hereby disclaim any warranty of suitability of our ingredients, alone or in combination with other products, nor to the information and suggestions that we are providing in respect to the intellectual property rights of third parties. Any person relying on the information and suggestions that we are providing shall do so at their own risk and we will accept no liability whatsoever with respect to them.

Any user of our ingredients shall themselves determine the suitability of our ingredients for their own intended use and as may be the case, obtain the required regulatory approvals for the commercialization of their finished products. Any person using our ingredients in the formulation of their own finished products are solely responsible for ensuring that the use of our ingredients, the finished products, the packaging, labelling and any claims they make with respect to their finished products and the ingredients they contain, comply with their country/state/regional applicable laws and regulations.

This product has not been tested on animals.
